Services:	Rural Standard
Zoning:	EETC / AG
Price:	\$3,577,500.00 (\$22,500.00/acre)
Possession:	Immediate

Edmonton Energy and Technology Park

The City of Edmonton has begun land use and infrastructure planning for the development of an energy and technology industrial land cluster in the northeast quadrant of the city, northwest of Manning Freeway.

Comprehensive studies have made the case for developing an industrial cluster in the area known locally as Horse Hill. Such a development would take advantage of the significant economic opportunities available to Edmonton and the surrounding region from the oil sand developments in the north.

Edmonton Energy and Technology Park (formerly known as the Horsehills Energy and Technology Park) is being planned to take advantage of these significant economic opportunities that are coming to Edmonton and the surrounding region. A copy of the city's brochure on the Park can be found at
